

6877 kHz : Psychological operations, possibly from an EC-130J Commando Solo III.

It asks Libyan naval officers not to board their ships in Arab, English and French. After a while the station was jammed.

I heard the station on 20-3-2011 at ca. 0900 UTC with a fair signal but quite noisy. Too noisy to make a good recording. The recordings on the website are courtesy of Andrea Borgnino.
